

جدول ۱ - مشخصات سامانه جهت یاب رادیویی

| Row | Parameter | Value |
|-----|---|--|
| ۱ | Frequency range | ۳۰۰ KHz - ۳۰ MHz |
| ۲ | DF method | correlative interferometer and wideband super-resolution |
| ۳ | Number of coherent measurement channels | ۱۰ |
| ۴ | Instrument DF accuracy | ± ۰.۲° RMS |
| ۵ | System DF accuracy • Ground wave • Sky wave | (In reflection-free environment, according to ITU-R SM.۲۱۲۰) • ۰.۵° RMS < ۰.۵°/cos(elevation) RMS |
| ۶ | Realtime bandwidth | Adjustable up to ۳. MHz |
| ۷ | Instrument DF sensitivity | -۱۴۷ dBm |
| ۸ | DF scan speed | > ۳۰ GHz/s (in line with Report ITU-R SM.۲۱۲۰) |
| ۹ | Processing speed | up to ۲۰,۰۰۰ channels/s |
| ۱۰ | Minimum signal duration | ± ۰. ۵ µs (in line with Report ITU-R SM.۲۱۲۰) |
| ۱۱ | Preselection filters | ۱. per channel, switchable |
| ۱۲ | Frequency resolution (channel spacing) | Adjustable up to ۱. Hz |
| ۱۳ | Dynamic range | ۱۷۳ dB |
| ۱۴ | Antenna type | Crossed-loop antenna with lightning rod |
| ۱۵ | Antenna polarization | Switchable between vertical, horizontal and circular |
| ۱۶ | Antenna element design | Active antenna elements with active/passive software switch |
| ۱۷ | Covers the ITU recommendations | ITU -R SM.۳۷۷ (frequency and frequency offset measurements) ITU-R SM.۳۷۸ (field strength measurements) ITU-R SM.۳۲۸ (determination of modulation modes) ITU-R SM.۴۴۲ (bandwidth measurements) ITU-R SM.۱۸۸- (determination of spectral occupancy) ITU-R SM.۱۸۳- (measurements of IF filter edge steepness) ITU-R SM.۱۸۳V (IP3 measurements) ITU-R SM.۱۸۳A (noise figure measurements) ITU-R SM.۱۸۴- (sensitivity measurements) |
